HANDOUT-2

1. Execute the following commands with different options (if any) and write the output in the observation book.

    pwd, cd, mkdir, rmdir

    cat, cp, rm, mv, more, file

2. Find the file type of any 4 files in your directory and note that in the observation book.

3. Create a file by name "I sem studs" which contains name and USN of all the students. Also display the contents of the file.

4. Execute the following using absolute pathnames :

    (i)   Create a file `/msrit/mca/firstsem/mca/mca1.txt`
    (ii) In the file `mca1.txt` enter the following information
            Good Morning
            Welcome to MSRIT
    (iii) In `mca1.txt` append the content *Department of Computer Applications*
    (iv) Copy the contents of *mca1.txt* to *mca2.txt* and rename *mca1.txt* to *mca.txt*
    (v)   From the directory `mca` go to home directory
    (vi) Delete `mca1.txt`
    (vii) Delete *msrit* directory

5. Create a directory structure `/home/MCA/Semester-1`. Create files by names MCA11, MCA12, MCA13, MCA14, MCA15, MCA16 with appropriate contents for the respective subjects.

    (i)   Copy all the files to the directory structure `/home/MCA/Isem-subjects` using relative path names
    (ii) Rename all the files to the directory structure `/home/MCA/Semester-1/subjects` using relative path names
